

February Meeting Announcement

INVENTION LOVE FEST, BRING YOUR SPOUSE

THREE LOCAL SUCCESS STORIES *(and shhhh . . . a surprise)*

Frank VanKempen and **Scott Sovereign** developed a very efficient ethanol still for farmers, letting them make their own ethanol fuel...and the waste is nutritious enough to feed cows. Small town farmers can make their own fuel with minimal energy input and zero landfill waste.

Mick Hanna refused to limp along on regular crutches after an Achilles tendon rupture, and came up with a great crutch product that lets people bear weight on their knee and upper leg and literally walk “hands free”. He joined with Alastair Brown to manufacture a novel crutch.

Eric Mulder came up with an in-line duct furnace with temperature control that is so popular, the nation’s largest electrical heating manufacturer (The TPI Corporation) licensed his patents AND HIRED HIM as their HVAC Vice President of Sales and Marketing.

ALSO, A SURPRISE PRESENTER will BBLLOOWW YOOOUU AAWWAAYY WITH A VIDEO IDEA.”

Please Join Us

Date: February 14, 2012
